

Franke Pro-Value Range

Designed with quality and value in mind

For kitchens without compromise.

FRANKE

KITCHEN
SYSTEMS

PRO-VALUE

The Franke Pro-Value Range features a level of craftsmanship that has been gained through almost a century of experience in manufacturing kitchen products.

Founded in Switzerland in 1911, Franke has grown to become the world's largest manufacturer of kitchen sinks. We're also an industry leader in design, quality and innovation – pioneering research and developing new materials and products for the kitchen.

Compact CPX 160P with Zurich Chrome tap

PRO-VALUE

With the Pro-Value Range, we offer world-renowned Franke quality at surprisingly affordable prices

A comprehensive choice of innovative Franke sink designs in a wide range of materials, shapes and sizes; all with elegant taps that fully complement each style – from cutting edge contemporary to modern classics.

Exceptional value with no compromise in Franke excellence

Efficient and economic manufacturing facilities allow us to offer competitively priced products with all the build quality for which Franke is famous. Franke have maintained the high standards of design, production and high-grade materials. The biggest difference is in the cost to you.

About Propacks

To make your choice easier, we've devised affordable Propacks that provide a perfect partnership of sink and tap. However, we want to offer you as much flexibility as possible, so each page will also suggest another complementary tap upgrade to allow you to achieve a look that's perfect for your kitchen. Some are also available with matching accessory packs (Accpacks) that transform your sink into a versatile work area.

Peace of mind with Franke quality

We have absolute confidence in the unparalleled quality of our sinks. That's why we offer a 50 year guarantee against any manufacturing defects.

50 Year 
Guarantee

Stainless Steel Sinks

Franke manufacture sinks using only premium quality chrome nickel steel. Not only does it look exquisite, it's thoroughly resistant to staining, chipping, rust and corrosion, as well as being exceptionally hygienic. These designs are available in a number of finishes, including silk, linen and 'Microdekor' – a warm, subtle surface that's delightful to touch.

Ceramic Sinks

Made from kiln-fired porcelain, Ceramic Franke sinks have a smooth high-gloss finish that's remarkably durable. It's tough enough to withstand the harshest treatment – so even after many years of loyal service, your sink can still look as good as the day you bought it.

Fragranite Sinks

An exceptionally tough material that's highly resistant to burns, dents chips and stains. Fraganite was pioneered by Franke and contains 80% granite to form a unique material with a subtle sheen that's warm to the touch. Innovative engineering has enabled us to improve the surface smoothness. It comes in a range of colours, along with matching accessories and two different finishes – standard Fraganite and SilkSheen for a smoother feel.

Taps

As the element of the sink that gets used the most, the choice of tap is paramount. The Pro-Value Range boasts the high quality Zurich tap as standard, combining classic looks with rugged durability. There is also a wide range of taps available as an upgrade, to offer you maximum flexibility when designing your kitchen.

Franke G-Clips

The next-generation installation system

The new patented Franke G-clip system is a revolution in the installation of undermounted sinks, with considerable savings. With this system you will see no visible difference from traditional fixing methods, whilst gaining the benefits of less installation time and effort required.

The innovative technology distributes weight from the sink bowl laterally through the use of simple metal clamps that can be fitted in minutes and are strong enough to withstand more than a 100kg weight. The application of sealant ensures a watertight seal, with the G-clip system firmly holding the sink in place. G-clips can easily be removed with a simple tap from a hammer. For more information and demonstration video visit www.franke.co.uk/gclip

Franke Rollamat

Truly versatile, the Franke Rollamat is an essential accessory for every kitchen

This multi-purpose item can help protect sink and kitchen surfaces and is extremely useful for hot pans, heavy objects and for defrosting food items. It also provides the ideal draining surface for modern flat draining areas on minimalist sinks and can be easily rolled up and conveniently stored away after use. This flexible little helper is dishwasher safe and will be a welcome addition to any hardworking kitchen.

Protects surfaces from hot pans and heavy objects.

Ideal draining surface for minimalist sinks.

Plumbing Kits

The perfect plumbing solution

Made of rigid grey polypropylene, these plumbing kits are the hygienic solution to a Franke sink waste system. Some sinks in this brochure require a plumbing kit to be purchased separately. The plumbing kits recommended within this brochure are shown below.

Siphon I 112.0059.946
for a single bowl sink €24

Siphon II 112.0052.536
for a 1½ bowl sink €36

Waste Disposal

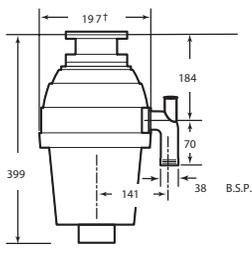

Waste Disposal Units

A choice of four units designed to free the kitchen of unsightly and unhygienic organic household waste. Each unit is the essential add-on for ensuring that all Franke appliances and work surfaces remain looking immaculate.

Thanks to a unique, permanent magnet motor, they reach high speed in a split second, producing more torque per kilo than any other of its type. Whilst running water through the unit, food waste is instantly liquefied into fine particles that are easily flushed through the pipework system.

(1) Ceramic disc tap – may require a 4 metre head of water in a conventional plumbing system. (2) Compression valve tap – usually suitable for any plumbing system. In some instances, pull-out nozzle and spray taps may require additional pumping or local authority approval prior to installation.

Franke strongly recommends that you consult your supplier/installer prior to purchase.

The figure in the symbol is designed to indicate the relative flow rate performance for each tap. The rate is graded 1-8 where 1 is poor and 8 is excellent. Relative flow rates are only likely to be relevant in installations with a low head of water (below 4 metres) or low cold supply pressure. In either case you would be well advised to consult your supplier or installer.

All Franke taps are designed to conform to Water Research Council requirements and are backed by nationwide servicing and guarantees.

Indicates tap is fitted with a Perlator® providing a champagne-like flow.

All prices inclusive of V.A.T. Current V.A.T. rate applies.

(1) Ceramic disc tap – may require a 4 metre head of water in a conventional plumbing system. (2) Compression valve tap – usually suitable for any plumbing system. In some instances, pull-out nozzle and spray taps may require additional pumping or local authority approval prior to installation.

Franke strongly recommends that you consult your supplier/installer prior to purchase.

1 The figure in the symbol is designed to indicate the relative flow rate performance for each tap. The rate is graded 1-8 where 1 is poor and 8 is excellent. Relative flow rates are only likely to be relevant in installations with a low head of water (below 4 metres) or low cold supply pressure. In either case you would be well advised to consult your supplier or installer.

All Franke taps are designed to conform to Water Research Council requirements and are backed by nationwide servicing and guarantees.

P Indicates tap is fitted with a Perlator® providing a champagne-like flow.

Franke product brochures all downloadable from www.franke.co.uk

A wealth of Franke expertise and information is available to you via our extensive suite of brochures. They're on hand to inform and inspire you – request yours today.

Specialist Range Brochure
994.0067.757

Decorative Hoods Brochure
994.0067.759

All the new Franke hoods in one brochure – high performance appliances with precision engineering. Franke hoods make a stunning addition to any modern kitchen.

Downloadable and available on request

All brochures are downloadable from www.franke.ie or phone the consumer brochure line **01 413 6400** to get your copy now.

Colours shown are for reference only. All sinks available with left or right hand drainer. The description 'reversible' means that the design enables the same sink to be turned to drainer on the left or drainer on the right. In the case of a 'handed' sink it is necessary to specify which side the drainer is required e.g. EUX 651 left hand/drainer or EUX 621 right hand drainer. All bowls sizes and dimensions are described in mm.

50 Year Guarantee Franke sinks have a 50 year guarantee against manufacturing defect. Franke taps are guaranteed against defective materials and workmanship for 1 year in relation to coatings and finishes, and 5 years in relation to moving parts. Franke will replace (and where appropriate repair) defective sinks. In relation to taps, Franke will, where appropriate, provide replacement parts for your taps or replace your taps at their discretion. Any associated or ancillary costs to be incurred by you as a result of replacement of Franke sinks and taps under this guarantee shall in all cases be previously approved by Franke UK Limited. This literature has been produced on chlorine free materials harvested from sustainable forests. The Franke policy is one of continual improvement and Franke reserves the right to alter models and specifications without notice. *Front cover shows the Maris MRG 651 sink in Coffee with Zurich Chrome tap.*

All prices inclusive of V.A.T. Current V.A.T. rate applies.

In line with Franke's environmentally friendly policy all our wooden food preparation platters are made from sustainable forests, and are FSC Certified. The FSC is an independent organisation that sets the standards for environmentally responsible forest management.
