FRANKE

Professional Range

Propacks

For kitchens without compromise.

FRANKE

KITCHEN
SYSTEMS

PROFESSIONAL

The Franke Professional Range features a level of craftsmanship that has been gained through almost a century of experience in manufacturing kitchen products.

Founded in Switzerland in 1911, Franke has grown to become the world's largest manufacturer of kitchen sinks. We're also an industry leader in design, quality and innovation – pioneering research and developing new materials and products for the kitchen.

Compact CPX 160P with Zurich Chrome Tap

Galassia GAK 611 with Danube Chrome Tap

With the Franke Professional Range, we offer the outstanding quality for which Franke are renowned at affordable prices.

It features innovative sink designs in a wide range of materials, shapes and sizes combined with a selection of taps that fully complement each style – from cutting edge contemporary to modern classics.

- **Exceptional value** – Franke have built up a global business that allows for efficient and economic product manufacture. At the same time, we've maintained the highest standards of design, production and high-grade materials. This means we can offer competitively priced products with no compromise on build quality.
- **Money-saving Propacks** – Providing convenient and affordable quality, Propacks comprise a sink, plus a recommended complementary tap. Some are also available with accessory packs (Accpacks) to suit, turning your sink into a versatile work area. You are also free to upgrade to the tap of your choice from any featured from page 18 of this brochure. The Professional range now also features an undermount sink, the Compact CPX 160P.
- **Hard wearing and tough to beat** – Sinks from the Professional Range are available in three different materials:
- **Stainless steel** – Made from premium quality chrome nickel steel – the perfect material for ensuring cleanliness and hygiene. These sinks look beautiful and are resistant to staining, chipping, rust and corrosion. Available in a number of finishes – Including brushed, silk and 'Microdekor' – a warm, subtle surface that's delightful to touch.
- **Ceramic** – made from kiln-fired porcelain for a tough, smooth gloss finish able to stand up to even the harshest treatment. Ceramic Franke sinks have a fingertip-smooth high-gloss finish designed to look perfectly pristine – even after years of loyal and hard-working service.
- **Fragranite** – a unique material pioneered by Franke that contains 80% granite particles to resist burns, dents, chips and stains. Naturally textured, warm to the touch and with a subtle sheen, it comes in a wide range of colours with matching accessories and two different finishes: Fragranite or SilkSheen for a silkier finish.

* Available in White, Almond, Brown or Black

†The description 'reversible' means that the design enables the same sink to be turned with small bowl on the left or on the right.

Plumbing Kits

Made of rigid grey polypropylene, these plumbing kits are the hygienic solution to a Franke sink waste system. The sinks in this brochure require a plumbing kit to be purchased separately. The plumbing kits recommended within this brochure are shown below.

Franke G-Clips

The next-generation installation system

The new patented Franke G-clip system is a revolution in the installation of under-mounted sinks, with considerable

savings. With this system you will see no visible difference from traditional fixing methods, whilst gaining the benefits of less installation time and effort required.

The innovative technology distributes weight from the sink bowl laterally through the use of simple metal clamps that can be fitted in minutes and are strong enough to withstand more than a 100kg weight. The application of sealant ensures a watertight seal, with the G-clip system firmly holding the sink in place. G-clips can easily be removed with a simple tap from a hammer. For more information and demonstration video visit www.franke.co.uk

All prices exclusive of V.A.T.

Waste Disposal Units

A choice of four units designed to free the kitchen of unsightly and unhygienic organic household waste. Each unit is the essential add-on for ensuring that all Franke appliances and work surfaces remain looking immaculate.

Thanks to a unique, permanent magnet motor, they reach high speed in a split second, producing more torque per kilo than any other of its type. Whilst running water through the unit, food waste is instantly liquefied into fine particles that are easily flushed through the pipework system.

Franke Turbo WD-500

Type: Continuous Feed €246.00

Motor horsepower: 1/2 HP
 Motor speed RPM: 2600
 Motor type: High Torque dual magnetic motor
 *Air switch: Integral
 Mounting system: Professional 3-bolt
 Warranty: 8 years

Franke Turbo WD-751

Type: Continuous Feed €385.00

Motor horsepower: 3/4 HP
 Motor speed RPM: 2700
 Motor type: High Torque dual magnetic motor
 *Air switch: Integral
 Mounting system: Professional 3-bolt
 Warranty: 10 years

Franke Turbo WD-1001

Type: Continuous Feed €503.00

Motor horsepower: 1 HP
 Motor speed RPM: 2800
 Motor type: High Torque dual magnetic motor
 *Air switch: Integral
 Mounting system: Professional 3-bolt
 Warranty: Lifetime

Franke Turbo WD-1001B

Type: Batch Feed €449.00

Motor horsepower: 1 HP
 Motor speed RPM: 2800
 Motor type: High Torque dual magnetic motor
 Air switch: Not applicable
 Mounting system: Professional 3-bolt
 Warranty: 10 years

Batch Feed model is activated by loading the chamber and rotating the WDU plug. Continuous Feed models are operated by an Air Switch (or alternative) and waste food is fed through the open neck of the unit. In both cases, a continuous supply of water is necessary whilst the WDU is in use. Member of REPIC for WEEE Regulations. EEE Producer Registration Number - WEE/DG0059TT.

(1) Ceramic disc tap – may require a 4 metre head of water in a conventional plumbing system. (2) Compression valve tap – usually suitable for any plumbing system. In some instances, pull-out nozzle and spray taps may require additional pumping or local authority approval prior to installation.

Franke strongly recommends that you consult your supplier/installer prior to purchase.

1 The figure in the symbol is designed to indicate the relative flow rate performance for each tap. The rate is graded 1-8 where 1 is poor and 8 is excellent. Relative flow rates are only likely to be relevant in installations with a low head of water (below 4 metres) or low cold supply pressure. In either case you would be well advised to consult your supplier or installer.

All Franke taps are designed to conform to Water Research Council requirements and are backed by nationwide servicing and guarantees.

P Indicates tap is fitted with a Perlator® providing a champagne-like flow.

 Chrome

(1) Ceramic disc tap – may require a 4 metre head of water in a conventional plumbing system. (2) Compression valve tap – usually suitable for any plumbing system. In some instances, pull-out nozzle and spray taps may require additional pumping or local authority approval prior to installation.

Franke strongly recommends that you consult your supplier/installer prior to purchase.

1 The figure in the symbol is designed to indicate the relative flow rate performance for each tap. The rate is graded 1-8 where 1 is poor and 8 is excellent. Relative flow rates are only likely to be relevant in installations with a low head of water (below 4 metres) or low cold supply pressure. In either case you would be well advised to consult your supplier or installer.

All Franke taps are designed to conform to Water Research Council requirements and are backed by nationwide servicing and guarantees.

P Indicates tap is fitted with a Perlator® providing a champagne-like flow.

Colours shown are for reference only. All sinks available with left or right hand drainer.

The description 'reversible' means that the design enables the same sink to be turned to drainer on the left or drainer on the right. In the case of a 'handed' sink it is necessary to specify which side the drainer is required e.g. EUX 651 left hand drainer or EUX 621 right hand drainer. All bowls sizes and dimensions are described in mm.

Franke sinks are guaranteed for 25 years against manufacturing defect. Franke taps are guaranteed against defective materials and workmanship for 1 year in relation to coatings and finishes, and 5 years in relation to moving parts. Franke will replace (and where appropriate repair) defective sinks. In relation to taps, Franke will, where appropriate, provide replacement parts for your taps or replace your taps at their discretion. Any associated or ancillary costs to be incurred by you as a result of replacement of Franke sinks and taps under this guarantee shall in all cases be previously approved by Franke UK Limited. This guarantee is in addition to and does not affect your statutory rights. Prices shown are UK mainland prices effective from 1st July 2007 and include VAT at the current rate of 17.5%. This literature has been produced on chlorine free materials harvested from sustainable forests. The Franke policy is one of continual improvement and Franke reserves the right to alter models and specifications without notice. **Front cover shows Galassia GAX 611 Sink with Zurich Chrome tap.**
